

PRATIK KUMAR NAYAK

Cybersecurity Analyst | SOC Operations | Cloud & Offensive Security

+91 80185 77793 | pratiknayak943@gmail.com | [Portfolio](#) | [GitHub](#) | [Linkedin](#)

PROFILE SUMMARY

MCA Cybersecurity graduate with hands-on experience in security monitoring concepts, IAM, access control, cloud security, and threat analysis. Built Mini-EDR and ReconX, demonstrating practical experience in endpoint detection, YARA-based detection, OSINT reconnaissance, vulnerability analysis, and security automation. Hands-on AWS exposure across IAM, VPC, Lambda, and EFS, with strong Linux, Windows, networking, and cybersecurity fundamentals.

RELEVANT EXPERIENCE

AWS Cloud Computing Intern — CUTM Summer Internship (CyberDojo)

- Built and documented cloud infrastructure projects covering IAM, custom VPC architecture with NAT Gateway, Lambda-based serverless pipelines, and EFS shared storage.
- Worked hands-on with cloud access control, security groups, and resource configuration in a live AWS environment.

Cyber Security Trainee Intern — YHills Edutech Pvt. Ltd.

Infosys Training & Internship Program | Jun 2026 – Aug 2026

- Conducting network reconnaissance and security assessments covering host discovery, port/service enumeration, OS fingerprinting, and exposed-service risk analysis using Kali Linux, Nmap, Wireshark, and Netdiscover.
- Performing a structured OWASP Juice Shop security audit covering reconnaissance, authentication/session testing, input validation, OWASP Top 10 vulnerability identification, and remediation analysis using Burp Suite, OWASP ZAP, and Nmap.

Cybersecurity Analyst Intern (Virtual) — TCS (Forage) [View](#)

- Worked on IAM fundamentals, access risk assessment, and security strategy design
- Assisted in access control review and incident analysis within IAM-based security workflows

PROJECTS

ReconX — OSINT & Cyber Intelligence Platform

- Built an automated OSINT reconnaissance platform integrating **11 security tools**, real-time WebSocket monitoring, Redis Pub/Sub, and CVE-based vulnerability reporting.
- Implemented a Celery scheduler for auto-rescans with diff detection and Discord/Telegram alerts.

Mini-EDR — Python, FastAPI, YARA, Ollama

- Built a cross-platform EDR with real-time process/registry monitoring, YARA-based detection, and automated quarantine to identify suspicious endpoint activity and attacker TTPs.

YHills Cybersecurity Capstone — Network & Web Application Security

- Conducted **network reconnaissance and security assessment** covering host discovery, port/service enumeration, OS fingerprinting, and exposed-service risk analysis using Nmap, Wireshark, and Netdiscover.
- Performed a **Security Audit of OWASP Juice Shop** covering application reconnaissance, authentication/session testing, input validation, OWASP Top 10 vulnerability identification, and remediation analysis using Burp Suite, OWASP ZAP, and Nmap.

SKILLS

- Security:** IAM, Active Directory, Access Control, Threat Analysis, Incident Response, Vulnerability Assessment, OSINT & Reconnaissance, YARA, CVE Analysis
- Cloud & Infrastructure:** AWS IAM, VPC, Lambda, EFS, Security Groups, Linux, Windows, Networking
- Security Tools:** Wireshark, Nmap, Burp Suite, OWASP ZAP, Nuclei, Nmap, Amass, Subfinder, FFUF
- Programming & Tools:** Python, Java, SQL/MySQL, Git/GitHub, VS Code, Cisco Packet Tracer

EDUCATION

Master of Computer Application — Centurion University (2024 - 2026)

Bachelor of Computer Application — Vikram Dev University (2020 - 2023)

CERTIFICATIONS

- NPTEL — Cyber Security Practitioners (Foundational Knowledge) [View](#)
